Profile Summary

I am a Master's student in Computer Science at TU Dresden with a strong focus on Data Science and Software Development. On the data science side, I enjoy working with machine learning models, data pipelines, and turning raw datasets into meaningful insights using Python, Pandas, and ML frameworks. On the software development side, I build scalable applications and backend systems using C++, Next.js, and FastAPI, with a focus on performance, clean architecture, and real-world usability. My goal is to bridge the gap between data and product — building intelligent systems that are not only accurate, but also useful, scalable, and production-ready.

Education

- Master of Science in Computer Science, Technical University of Dresden
- Bachelor of Engineering in Computer Science, Mumbai University, India

Skills

- **Programming & Data:** C++, Python, SQL, Pandas, NumPy, SQL
- **Software Development:** ASP.NET Core (Web API), React.js, RESTful APIs, Entity Framework Core, JWT Authentication, Full-Stack Development, SaaS Architecture
- **Databases:** PostgreSQL, MySQL
- **Data Engineering:** Data collection, cleaning, ETL workflows, preprocessing
- **Visualization:** Matplotlib, Seaborn, dashboards/reports
- **Tools:** Git, GitHub, Microsoft Excel, VS Code
- **Core Strengths:** Analytical thinking, problem-solving, attention to detail, teamwork

Professional Experience

System Engineer | Seclore, Mumbai | Jul 2024 – Sep 2025

- Worked with structured systems and data processes to ensure reliability and performance
- Automated repetitive workflows, improving operational efficiency and data consistency

- Collaborated with cross-functional teams to implement technical improvements

Developer Intern | Sequel String | Feb 2023 – Mar 2023

- Developed Python scripts for data extraction, transformation, and processing
- Structured datasets for analysis and reporting purposes
- Built visual outputs to communicate findings effectively

UI Developer Intern | Etihad Holidays | [Sep 2022 – Oct 2022]

- Built and improved user-facing web components with focus on usability and data presentation

Projects: (GitHub Link: <https://github.com/Tusharr1212>)

Optriax – Business Management Platform (Full-Stack SaaS)(ASP.NET Core, React, PostgreSQL, Docker)

- Built a full-stack SaaS platform for small to medium businesses to manage **inventory, expenses, sales, and profit analytics** in a unified system.
- Developed RESTful APIs using ASP.NET Core with clean layered structure (Controllers, Services, Repositories)
- Built an interactive dashboard with **business KPIs, charts, and financial insights**
- Implemented core modules for inventory, expense tracking, and sales management
- Enabled automated **profit/loss reporting and data visualization**
- **Live website:** <https://optriax-ui.vercel.app/>
Login: Tzzzz@gmail.com **Password:** Tzzzz123456

Customer Churn Prediction System (Python, SQL, ML)

- Built an end-to-end pipeline for preprocessing customer data, feature engineering, and predictive modeling
- Used structured datasets to generate retention-focused business insights

Blockchain Health Insurance System (Solidity, WebDev, Blockchain)

- Built a secure decentralized platform for health insurance workflows and claims logic
- Focused on data integrity, secure records, and automated verification processes
